Summary

An Engineer mainly focusing on data scientist and GenAI fields. I wanted to work in a premier organization which gives me ample opportunities to apply my skills, to grow and to contribute in the most effective manner by being a key and effective team player.

Work Experience

09/2025 – Present
Bangalore

Tenarai (Formerly known as Infogain)
Consultant - Analytics (GenAI)
Achievements/Tasks
- AI-Powered CMS Migration Tool
- Built a 3-stage agentic pipeline (Content Analysis → Model Matching → JSON Generation) using Claude claude-sonnet-4 via LangChain to fully automate legacy web page migration into Contentstack CMS
- Implemented RAG using Pinecone + OpenAI embeddings to retrieve semantically similar HTML-to-JSON examples as few-shot context, improving LLM output accuracy
- Engineered a self-healing AI validation loop that feeds schema errors back to Claude for auto-correction — up to 2 retries per component with zero human intervention

Education

08/2021 – 06/2025
Phagwara, Punjab

Bachelor of Technology
Lovely Professional University
8.4 GPA Courses
- Computer Science and Engineering

Skills

- Python
- MySQL
- LLM
- Langchain
- RAG
- Machine Learning
- Data Analysis
- Github
- Jupyter Notebook
- VScode
- Java
- Agentic AI

Projects

10/2025 – 02/2025

HANDTRACK – Gesture-Based System Controller
https://smart-controller-website.onrender.com/
- Developed a real-time gesture-based controller for presentations and screen interaction using Python, MediaPipe, and OpenCV.
- Implemented hand tracking, gesture recognition, and GUI using Tkinter.
- Built modular features for mouse control, slide navigation, and screen zoom.
- Deployed a companion website on Render with tutorials, EXE downloads, and live demonstrations.
